ILLUMINATE YOUR WORLD

DYNA PRO

16-bit Higher Grey Level

Grey level is the decisive factor for displaying the colors.
The higher the Grey level, the richer the displayed colors and the more delicate the picture.

ILLUMINATE YOUR WORLD

Low refresh rate

High refresh rate

3840Hz High Refresh Rate

The display is smooth like flowing water, the picture quality is clear, and the colors are bright and distinct.

ILLUMINATE YOUR WORLD

DYNA PRO

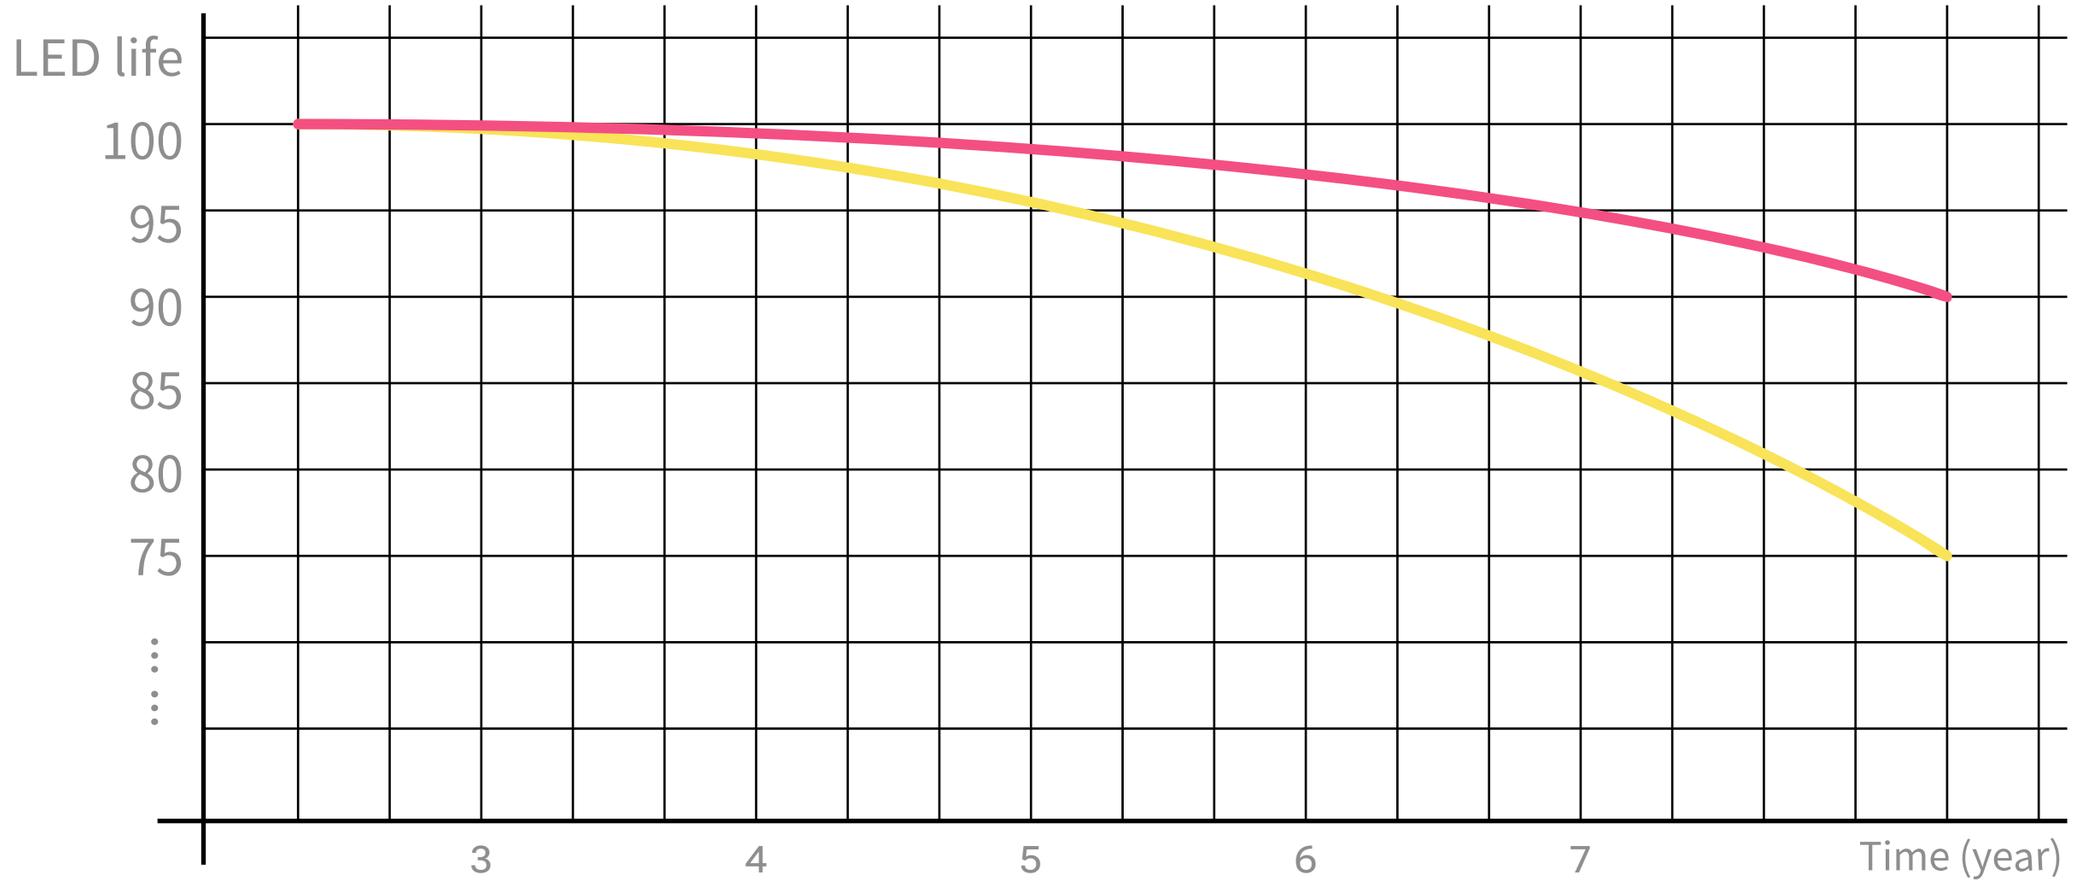

Ultra High Definition

To guarantee the premium visual effect with higher deinition, higher contrast, and higher saturation.

ILLUMINATE YOUR WORLD

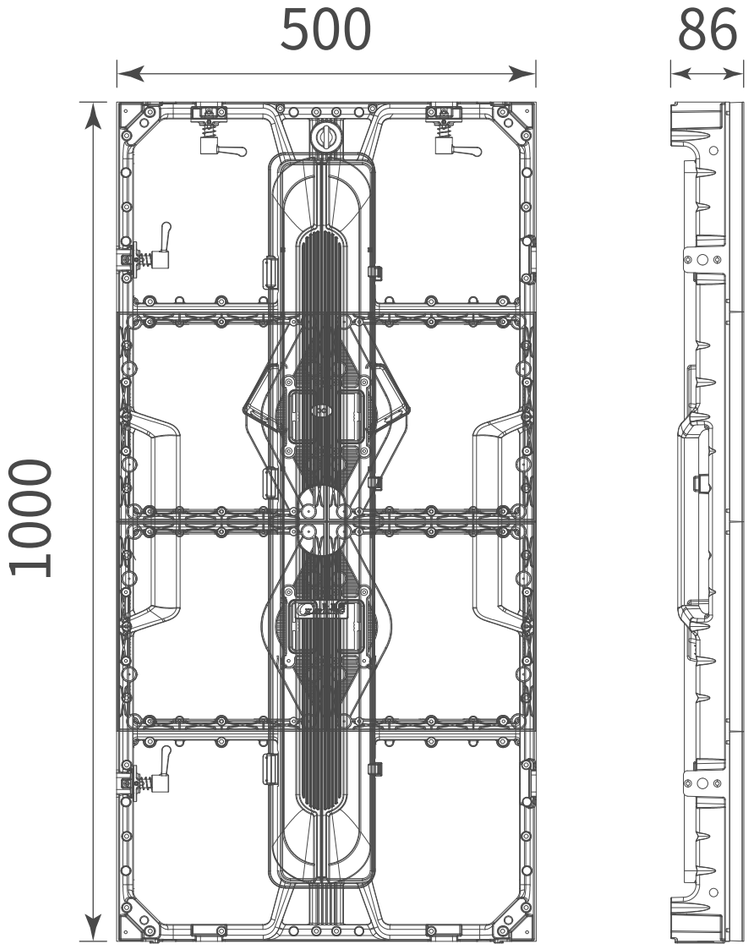

DYNA PRO

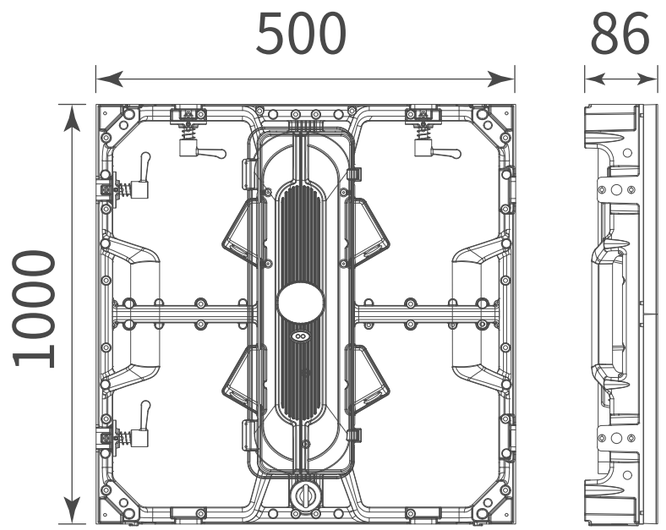

Using High-quality Lamp Beads

Longer life than
general products on the market.
